Arbiom Named Winner of Triangle Business Journal Life Sciences Awards

Agricultural-biotechnology company one of 12 recipients for award

Durham, N.C. – June 7, 2018 – [Arbiom](http://www.arbiom.com), an agricultural-biotechnology company developing solutions to convert wood into food, has been selected as a winner of the [2018 Triangle Business Journal Life Sciences Awards](#), recognizing Triangle-based individuals and organizations breaking ground in the field. Arbiom was recognized in the “Best Early-Stage Product Development Company” category.

Each year, Triangle Business Journal recognizes individuals and organizations contributing to the robust growth of the life sciences industry in the Research Triangle Park (RTP) area of North Carolina. This year’s winners were selected to reflect the influence and innovation present in the region’s biotechnology, pharmaceuticals, clinical research, human health, and medical devices and diagnostics communities.

“We are honored to be recognized for a Life Sciences Award and to be headquartered in one of the fastest-growing and most innovative regions for biotechnology,” said Marc Chevrel, Arbiom CEO. “We have made great technological advancements this past year and look forward to continued growth as we continue to develop ground-breaking solutions to meet the sharp increase in future food demand.”

Arbiom is one of 12 companies selected as winners for the Life Sciences Award. Arbiom, along with other winners, were recognized at an awards ceremony held May 10, 2018.

About Arbiom.

Arbiom is committed to meeting the sharp increase in global food and resource requirements with technology that transforms the most sustainable and readily available carbon source in the world – wood – into intermediate materials for a range of applications in the feed, food, and chemicals industries. Arbiom’s technology platform integrates the company’s proprietary enzyme technologies and biomass processing expertise to convert wood into food. Arbiom is partnering with biomass stakeholders and leading firms in aquaculture, livestock, and biobased industries to continue developing and scaling up its technology. Headquartered in Durham, North Carolina, Arbiom has offices in Paris, France and Norton, Virginia, where it operates a pilot plant. More information at www.arbiom.com
