Arbiom Recognized with Prestigious Life Sciences Award for Second Consecutive Year
Agriculture-biotechnology once again honored by Triangle Business Journal

Durham, N.C. – May 23, 2018 – [Arbiom](http://www.arbiom.com), an agriculture-biotechnology company developing solutions to convert wood into food, has been selected as a winner of the [2019 Triangle Business Journal Life Sciences Awards](#), recognizing Triangle-based individuals and organizations breaking ground in the field. For the second consecutive year Arbiom was recognized in the “Best Early-Stage Product Development Company” category.

Each year, Triangle Business Journal recognizes individuals and organizations contributing to the robust growth of the life sciences industry in the Research Triangle Park (RTP) area of North Carolina. This year’s winners were selected to reflect the influence and innovation present in the region’s biotechnology, pharmaceuticals, clinical research, human health and medical devices and diagnostics communities.

“We are honored to once again be selected as a Life Science Award winner among other industry-leading individuals and companies based in Research Triangle Park,” said Marc Chevrel, Arbiom CEO. “In the past year we have expanded our production capabilities and through several promising animal feed trials, and this award is validation of our continued growth as we build further momentum toward product commercialization.”

Arbiom is one of 12 companies selected as winners for the Life Sciences Award. Arbiom, along with other winners, will be recognized at an awards ceremony held May 23, 2019.

About Arbiom

Arbiom is committed to meeting the sharp increase in global food and resource requirements with technology that transforms the most sustainable and readily available carbon source in the world – wood – into intermediate materials for a range of applications in the feed, food, and chemicals industries. Arbiom’s technology platform integrates the company’s proprietary enzyme technologies and biomass processing expertise to convert wood into food. Arbiom is partnering with biomass stakeholders and leading firms in aquaculture, biotechnology and bio-based industries to continue developing and scaling up its technology. Headquartered in Durham, North Carolina, Arbiom has offices in Paris, France, and Norton, Virginia, where it operates a pilot plant. More information at www.arbiom.com
