Arbiom Recognized with Social Responsibility Award

*“Wood-to-food” pioneer honored for social and environmental sustainability
at French-American Chamber of Commerce of the Carolinas Inaugural Business Awards*

Raleigh, N.C., October 12, 2019 – [Arbiom](http://www.arbiom.com), an agriculture-biotechnology company developing solutions to convert wood into food, was chosen as the winning company of the Social Responsibility Award at the annual French-American Business Awards, hosted by [The French-American Chamber of Commerce-Carolinas](http://www.facc-carolinas.com) (FACC-Carolinas). The Social Responsibility Award celebrates economic growth in the context of social and environmental sustainability.

The FACC-Carolinas promotes and fosters strong economic and commercial ties between the United States and France to support the diverse network of companies establish and grow their businesses on both sides of the Atlantic Ocean. This year’s Business Awards Gala, held on October 10, 2019 at the North Carolina Museum of Art, brought together over 200 attendees from 29 French companies with operations in North and South Carolina. Along with the Social Responsibility Award, eight other companies were honored in categories including Innovation, and Education & Culture.

“Since our inception, Arbiom’s mission has been to develop technology that offers a more sustainable solution to meet society’s growing demand for food, energy and materials without harming our planet,” said Marc Chevrel, Arbiom CEO. “It is an honor to be recognized by the French-American Chamber with the award for Arbiom’s continued commitment to Social Responsibility as we continue to scale-up our technology.”

About Arbiom

Arbiom is committed to meeting the sharp increase in global food and resource requirements with technology that transforms the most sustainable and readily available carbon source in the world – wood – into intermediate materials for a range of applications in the feed, food, and chemicals industries. Arbiom’s technology platform integrates the company’s proprietary enzyme technologies and biomass processing expertise to convert wood into food. Arbiom is partnering with biomass stakeholders and leading firms in aquaculture, biotechnology and bio-based industries to continue developing and scaling up its technology. Headquartered in Durham, North Carolina, Arbiom has offices in Paris, France, and Norton, Virginia, where it operates a pilot plant. To learn more about Arbiom, visit www.arbiom.com
